Chosen Path is here to assist with all of your Cyber Security needs. We have Subject Matter Experts (SMEs) to help guide our clients on their successful journey to protect company's data and information technology.

Cyber Security & Risk Assessments

We utilize industry-recognized risk management and cybersecurity frameworks to perform in-depth risk assessments and analyses that are utilized to identify and mitigate persistent security risks associated with a myriad of hardware, network and software implementations.

We leverage proven methodologies that ensure the optimal confidentiality, availability and integrity of the data that is processed by the system.

We provide expert guidance in policy, process, and procedure development in accordance with all governance and compliance entities as well a current process and documentation maturation. We employ the most current vulnerability, analysis, and compliance tools to help protect customer assets as well as provide metrics that would delineate key performance indicators/inhibitors.

Artificial Intelligence & Machine Learning

It can be challenging and time-consuming to find the ideal Subject Matter Expert (SME) for your Artificial Intelligence (AI) and Machine Learning (ML) employment needs. Our recruitment experts keep in touch with high-demand candidates, who works exclusively with us on a regular basis**.**

Chosen Path can help you find the Cyber Security, AI & Machine Learning experts your company needs!
